

1 **FINAL CONSOLIDATED DRAFT OF CAN THO STATEMENT ON**
2 **Enhancing Food Security and Sustainable Agriculture in Response to Climate Change**
3
4
5

6 **Preamble**

7 We, the APEC Ministers and high-level representatives responsible for food security and
8 agriculture, met in Cần Thơ, Việt Nam on 25 August 2017 under the chairmanship of Mr.
9 Tran Hong Ha, Minister of Natural Resources and Environment of Viet Nam, to discuss
10 cooperation and solutions to enhance Food Security and Sustainable Agriculture in
11 Response to Climate Change in the APEC region.

12 We welcome the participation of the representatives of Food and Agriculture
13 Organization, Association of Southeast Asian Nations and World Economic Forum.

14 We underscore that food security is and will remain a critical issue for the international
15 community in general and in the APEC region in particular, given that global food
16 production must rise in volume by at least 60 percent by 2050 to feed the expected
17 world's population of 9,15 billion people. We also highlight the significant role of APEC
18 economies in today's agricultural value chain and the importance of trade.

19 We recognize the linkages between food security, poverty, climate change and
20 sustainable development. Sustainable and resilient agriculture, aquaculture and fisheries
21 contribute to advancing a number of the Sustainable Development Goals by enhancing
22 food security, rural employment, poverty eradication, community empowerment,
23 economic development, environmental protection and adaptation to climate change.

24 Under the overarching theme of "Creating New Dynamism, Fostering a Shared Future",
25 and recognizing that climate change is one of the four major priorities of APEC 2017, we
26 seek to address, through relevant APEC fora, including ATCWG, PPFS, OFWG and
27 HLPDAB, the following key issues related to food security, through sustainable
28 agriculture, aquaculture and fisheries:

29
30 **Addressing the food security – climate change relationship**

31 Increasing frequency and intensity of extreme weather events due to climate change are
32 already negatively affecting agricultural production systems and food security. We
33 endorse the APEC Multi-year Action Plan on Food Security and Climate Change to
34 promote a more coordinated regional effort at addressing the closely linked challenges
35 of food security, development, and climate change adaptation and mitigation.

36

37 **Sustainable natural resources management**

38 We are conscious that the region's natural resources are under stress from
39 overconsumption, land and marine habitat degradation, fresh water scarcity and loss of
40 biodiversity. Greater concerted efforts, including regional coordination, to foster
41 sustainable use and management of land, forests, water and marine resources, are
42 essential to both food security and environmental protection.

43 We believe it is critical to strengthen policy and technical cooperation to improve
44 sustainable use of natural resources while securing long-term food supply, including:

- 45 ▪ Fostering relevant and coherent policies that promote climate-resilience, water
46 and energy efficiency, biodiversity conservation, and sustainable growth;
- 47 ▪ Encouraging investments in a range of integrated approaches at various scales
48 that build synergies and manage trade-offs;
- 49 ▪ Implementing innovative successful programs and best practices that promote
50 the sustainable use of land, forest, water, aquatic resources through local,
51 regional, sub-regional, and economy-wide programs and institutions, as a matter
52 of priority;
- 53 ▪ Addressing the sustainable management and protection of land and marine
54 ecosystems for food security and livelihoods.
- 55 ▪ Promoting activities that make the agriculture, aquaculture and fisheries sectors
56 more resilient to climate-related risks such as droughts, flooding, salination and
57 water quality deterioration; intensify cooperation to mitigate impacts of drought,
58 flood, extreme events of El Niño-La Niña (ENSO), and climate change exacerbated
59 disasters to address sustainable agriculture, aquaculture, fisheries and food
60 security; implement and scale up actions towards restoring degraded land,
61 marine, coastal, lake and river ecosystems and addressing drought issues.
- 62 ▪ Addressing the negative impacts of illegal, unreported and unregulated (IUU)
63 fishing on fish stocks, the marine environment and food security.

64

65 **Sustainable rural-urban development**

66 We acknowledge that most agricultural production takes place in rural areas, where
67 large proportions of poor and malnourished populations live. Accordingly, rural
68 development, as well as rapid urbanization and the subsequent demographic and diet
69 changes, have significant implications for food security and quality growth.

70 We underscore that sustainable rural-urban development includes minimizing the
71 negative impacts of land-based activities on marine and coastal ecosystems, and the lack

72 of effective solid waste management infrastructure imposes great socio-economic and
73 environmental costs.

74 We, therefore, encourage APEC member economies to further promote innovative,
75 inclusive and resilient rural development, and economic growth. That includes
76 empowering farmers, disadvantaged groups, such as women and indigenous populations,
77 smallholders and micro, small, and medium enterprises (MSMEs) in agriculture, to
78 secure livelihoods, reduce poverty and improve food security for farming and fishing
79 communities. Meanwhile we promote sustainable urban development that links rural
80 and urban areas creating food systems that meet the nutritional needs of all consumers,
81 particularly smallholder farmers and the urban poor. The development of competitive
82 agriculture and food value chains will help promote rural development by adding value
83 to farmers' products and reducing food loss and waste.

84 We welcome the efforts made by APEC member economies to share best practices and
85 experiences in promoting sustainable rural-urban development. We endorse the Action
86 Plan on Rural-Urban Development to Strengthen Food Security and Quality Growth.

87

88 **Facilitation of trade and investment in agriculture and regional food markets**

89 As APEC members are among the world's largest food producers and traders, we
90 recognize that trade and investment in food, agriculture, aquaculture and fisheries are
91 crucial to food security in the APEC region and beyond. We underscore that it is vital for
92 farmers to have access to domestic, regional and international markets. The profitability
93 of agricultural producers is crucial for a successful agriculture sector and for food
94 security. We, therefore, welcome further joint efforts in promoting trade facilitation,
95 innovative technologies, food market access and integrity and supply chain connectivity
96 so as to reduce costs of food trade and improve market transparency. We will strive to
97 reduce non-tariff trade barriers to promote the efficient flow of agriculture and fisheries
98 products. We note the ABAC study on non-tariff barriers in agriculture and food trade in
99 APEC's work to address NTMs and will continue to consider how to work on this issue.

100 An enabling policy and regulatory environment is also needed to foster and facilitate
101 investment in rural transport, connectivity, logistics, agro-industry clusters and other
102 services to improve farming, food processing and the linkage of food markets, consistent
103 with international obligations. The cooperation in this regard can cover, but not be
104 limited to, the following activities:

- 105 ▪ Advance the Lima Declaration on the Free Trade Area of the Asia-Pacific (FTAAP)
106 and develop the multi-year work program to further enhance APEC economies
107 ability to participate in high quality, comprehensive free trade agreement
108 negotiations in the future.

- Engage private sector in a meaningful, comprehensive way that can help develop models that are integral to core business strategies and meet the regional food security challenge. These “win-win” partnerships are advancing the impact of sustainable development and will foster private sector-led growth in emerging markets, critical to reducing poverty, fighting hunger and improving nutrition.
 - Support member economies' individual and collective efforts to (i) Develop science-based, transparent policy environments that enable open markets, private sector investment, and gender-equitable access to factors of production, products, and income; (ii) Promote effective institutions and services, such as rural extension and finance, to enable both women and men producers to acquire, protect, and use the assets they need to take advantage of emerging market and trade opportunities; (iii) Strengthen producer and other rural organizations to help them participate effectively in domestic, regional and global food value chains, reduce transaction costs, acquire productivity-enhancing technologies, and make use of information on domestic, regional, and international markets.
 - Greater convergence among economies based on sound scientific principles, international standards, guidelines or recommendations, where they exist, would ultimately enhance food safety and provide for incremental improvement in public health while promoting a predictable, fair, transparent and open trading environment, consistent with members’ rights and obligations under the Sanitary and Phytosanitary Measures (SPS) and the Technical Barriers to Trade (TBT) Agreements of the World Trade Organization

131

132 We acknowledge that agricultural biotechnologies can be used as tools to enhance
133 agricultural productivity, raise farm income, protect the environment, strengthen food
134 security and mitigate against the impact of climate change. We will work together
135 toward the promotion of transparent, science-based and functioning regulatory systems
136 that allow the development, application and safe trade of innovative agricultural
137 biotechnologies for the benefit of APEC member economies. We encourage the
138 management of regulatory differences through the development of transparent and
139 science-based solutions to global challenges.

140

141

142 **Food loss and Food waste management**

143 We highlight that post-harvest food loss and waste remains a challenge that demands
144 further actions, including infrastructure development as well as implementation of
145 innovative technologies among APEC member economies. The collaboration and co-
146 ordination of regional initiatives on food loss and waste reduction is essential.

147 We call on economies to continue to advance the implementation of the APEC Action
148 Plan for Reducing Food Loss and Waste and value the progress of the APEC Food Losses
149 Multi-Year Project. We encourage all member economies to strengthen public-private
150 partnership on awareness raising, capacity building, and investment, and consider
151 further collaboration on relevant APEC action plans.

152

153 **Looking forward**

154 We reiterate our commitment to achieving a sustainable APEC Food System by 2020
155 through the implementation of the APEC Food Security Roadmap Towards 2020 and past
156 APEC Ministerial Declarations on food security.

157 We are encouraged by the outcomes of the Dialogue between Ministers and CEOs on
158 the Responsible Use of Resources to Enhance Sustainable Food Production and Agri-
159 business preceding our High Level Policy Dialogue. We emphasize the importance of
160 engaging the private sector and other stakeholders in the development of the APEC
161 Food System.

162 We welcome the successful convening and fruitful outcomes of the individual and joint
163 meetings of the ATCWG, PPFS, OFWG and HLPDAB, as well as the series of food-security
164 related workshops.

165 We will report the outcomes of the High level Policy Dialogue on Food security and
166 Sustainable Agriculture in response to Climate change, including this Statement and the
167 APEC Multi-year Action Plan on Food Security and Climate Change and the APEC Action
168 Plan on Rural-Urban Development to Strengthen Food Security and Quality Growth to
169 the APEC Ministerial Meeting and the APEC Economic Leaders' Meeting in Da Nang this
170 November.

171 We thank the Government of Viet Nam for the warm hospitality and excellent
172 arrangements for the 2017 APEC Food Security Week and the High Level Policy Dialogue
173 in Cần Thơ city. We look forward to the next APEC Ministerial Meeting on Food Security
174 to be hosted by Papua New Guinea in 2018.
