Research and related work on grain loss and waste in China

Xia Danping, The State Administration of Grain of China

July 18th, Taibei, China

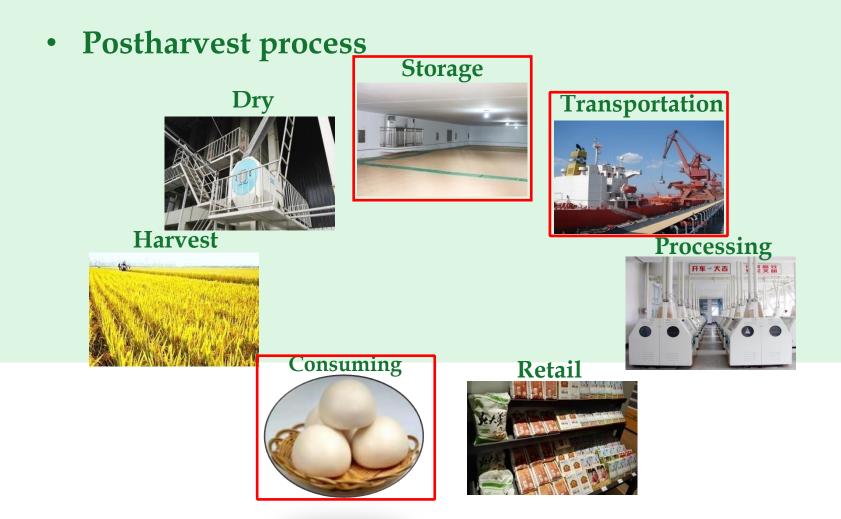

Outline

1.Basic status of grain loss and waste
2.Overview of postharvest loss and waste investigation
3.Investigation method of consumption section
4.Work Development and Future Work

1.Basic status of grain loss and waste

- 20 years ago, people began to pay attention to the postharvest loss and waste and realized the importance of figuring out the amount of loss and waste.
- SAG made a preliminary assessment on postharvest loss and waste in 2013, in which we mainly focus on 4 important sections.

1.Basic status of grain loss and waste

AND THE REAL

- Farmer storage
- Annually, more than 50% of the grain output are stored by farmers.
- Weather, improper storage methods and facilities effected the quantity and quality of grain

- Storage and transportation
- The percentage of packaged grain transportation is more than 80%. Grain are easily spilled out during transportation and removal
- Quality declines during storage which bring nutrition loss and edible quantity decrease as well

- Food Processing
- Due to excessive manufacture process, the nutrition loss and edible part become unedible
- Food Consuming:
- **>** Table waste & food reach sell-by date

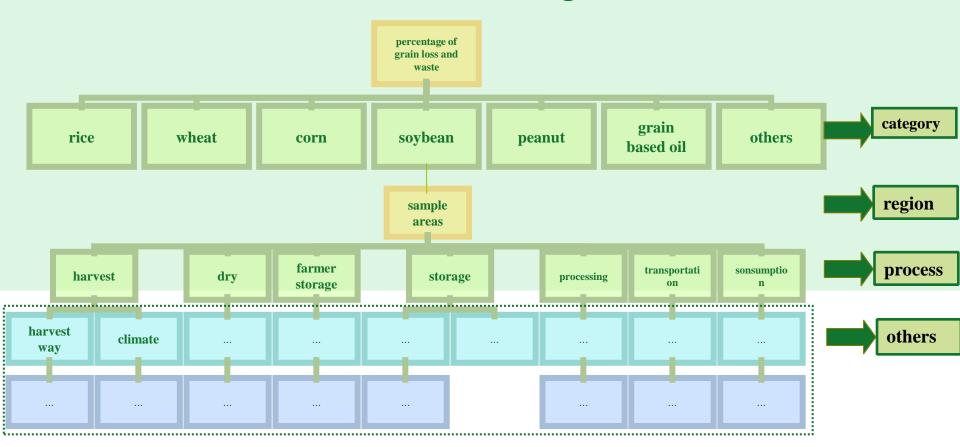

Overview of postharvest loss and waste investigation

- SAG started a specific investigation of loss and waste after grain harvest since 2015, which would last 3 years.
- Study Objectives: Assess current status of grain loss and waste comprehensive, systematically, scientificly, analyse the causes of grain loss and waste, find the best way to reduce it.

- Definition of grain and grain loss & waste
- ➢ grain
 - raw grain ; grain based food; oil crops; meat, eggs& milk
- ➤ grain loss and waste

Discarding, deterioration of grain, which is attacked by pathogens, pests and rodents resulting from inproper economic behavior and storage facility, technology, management etc. 2. Postharvest loss and waste investigation

• Dimension Structure of Investigation

• 3.Investigation method of consumption section

 Investigation Subjects Household consumption
 {
 Urban consumption Rural consumption
 {
 Social consumption
 {
 Restaurant Dining hall (institution, school and company)
 }

- Sampling method
- Overall consider consumptive habits, economic development difference, population distribution, representativeness, take samples from 12 provinces or cities in 11 regions.

- Data collection:
- Data collection was done by investigation teams of provincial statistical bureaus and the team members of research program
- We collect sample information, consumption records and survey questionnaire

Household consumption survey questionnaire

第一部分:个人信息[被调查人为美华或者之某人]

1. 英単人的信息(确在相应选项上計句) **4. 年齢 位**20 岁以下 位21-30 岁 位31-40 岁 の41-50 岁 G\$1-60 岁 ⑥60 岁以上

L 性別 ①好 ②女

C. 致生状现 ①全 QL作 ② 兼 Q ① 无 业或 失止 ③ 患体 ③ 家务 ⑤ 军人 ② 学生 ③ 不道用

D. 就量都自 ①政府部门 ①事业举位 ②团有全业 ③私营全业 ③外资全业(包括港澳台全业) ⑥个体工商业 ②不适用

1. 月秋入 ①3000元以下 ②3000-5000元 ③5000-8000元 ③8000-10000元 ③10000-15000元 ⑤15000元以上

P. 最有程度的小学或以下 的初中 的诗中 的大学 G硕士 的博士

G. 是否有减外学习, 工作整新? ①有 ① ⑦ ⑦ ⑦

L 是否有罪住居民(半年以上)①是、米当地有多少年了----(年)?①否

J. 各是否有过多本经历? ①将 ①无

L 你是否本来来快店的会员? ①是 ① ② ③

2 你是否之主要负责这次成差的人?①是 ①중

3. 本状成集集团 印刷多/公务 印京旋聚会 印崩克聚会 印工作聚卷 G日常就卷 田其伯。 请注明------

4. 意來这家餐饮氣內或餐药與筆? ①几乎每天 ①每周1次 ②每半月1次 ③每月1次 ③少于每月1次

5. 患子向外出成每(除食量外)的状质? ①几乎每天 ①每周3-4次 ①每周1-2次 ①每半月1次 ③每月1次或以下

6. 吃当前这家根内高档的地方有多少块? ①几乎每天 ①每周3-4次 ③每周1-2次 ③每半月1次 ③每月1次成以下

7.卷合道注意到最多也要保的友情要示应传奉(可多匙)? ①没有注意到 ②点餐时 ③就餐时

影**今天本店有打新菇油吗?** ①有 ②无 ③不知道

9. 意认为我国的下列各自然资源的蚂杖程度如何?【通知》】

	①不产度	@不太产度	回殺严重	团很广重	⑥不浦芝
*					
耕地					
能源					
₹ <i>P</i>					

10. 与大多致人相论。老个人觉得下列患羽程虎如何?【诸葛 4】

	田根橋	田枝肴	田铁强	白液的	日不清楚
环保意识					
能康惠识					
节检察识					

11. 意认为我们回来目前是否有食物均认的抱忧? ①有 ① ① 元

12. 意家里是否有一起答信的 50 岁以上的威翼(过去一年内界计在意家居住地 过 3 个月)? ①有 ①无

13. 患注患到躯体关于减少食物成囊的公益广告了吗? ①是 ① ② ③

14. 意子时在外或表时、如果有封金、是否会打包干回? ①从来不對 ①从来不打包 ①偶尔打包 ①经常打包

15. 如果**打包, 大都分打包回家的食物最终去向增至?** ①吃掉 ①场先彻吃掉 ①泰余处理掉 ③不适用

- Data collection
- On site measurement researchers upload datas to data collection platform by hand-held apparatus periodically

- We are continuing the following work
- Promote scientific and civilized catering consumption mode
- > Reduce food loss and waste in all sections
- > Promote resource utilization of food waste
- > Raise pubic awareness

- "n+1" type order
- "clear your plate" campaign
- half-portioned dishes in dining hall or cafeteria
- Pack and take away

- SAG started the Grain Security Project since 2014.
- Unblock logistics channels
- > Restore storage facilities
- Complete the emergency supply system
- > Ensure grain and oils quality & safety
- Enhance grain and oils market monitoring and early warning
- Promote grain conservation and loss-reduction

• Public awareness increasing events by SAG

"Love Food Save Food"Publicity week on World Food Day

National Food Science and technology activity week

Popular science lectures

Social practice base for students

Experiencing events on investigation of grain saving

saving and reduce losses and grain saving tools

AN ANTON

Manares

- SAG will promote public awareness on food saving and loss reduction through series of events and programmes
- Continuing reporting on food loss situation, the meanings of food safety and social benefits of loss reduction through mass media

- Promote research and put forward more measures and suggestions, improve laws and regulations, strengthen supervision and management of each section, strengthen the management of food waste recycling
- Reduce Food waste in human body (resulting diseases like fat, metabolic disease etc.)

Thank you for your attention!
